## QATAR SERVICE PLATFORM (QSP)

One Platform for e-Services

The **Qatar Service Platform (QSP)** is the flagship initiative under ictQATAR's integrated government (i-Gov) Program to develop and integrate government-wide e-Services in support of their charter to harness ICT to achieve public service innovation.

ictQATAR partnered with Ecquaria Technologies, a Singapore company providing e-government infrastructure consultancy and solutions to develop a single integrated platform called the Qatar Service Platform based on the company's flagship software infrastructure product, the Ecquaria Service-Oriented Platform™ ("Ecquaria SOP™").

The QSP provides the platform that hosts existing and future government e-Services. Designed with a common service gateway, the QSP allows agencies the flexibility to develop and host their e-Services centrally and reap efficiencies across agencies through sharing of common services such as user authentication and e-payment.

The QSP helps to meet the objectives of ictQATAR to connect, enrich and inspire Qatar's citizens and businesses, transforming the way the government and businesses run and improving the lives of the people who live and work in Qatar.

### Benefits

- Unified government-wide approach
- Improved efficiency, transparency and governance
- One common platform for all e-Services
- Speedy development and deployment of new e-Services
- Common Service Gateway
  - A trusted service broker between service providers and consumers
  - Common standards and interface for easy publishing, consumption, management and tracking of common services
- Shared costs across common services
- One unified user experience via a single login

*"It has been a very good joint effort (between ictQATAR and Ecquaria) to prepare for the launch of this (QSP) system. We are looking forward to a very high adoption of this system by the business community."*

**Khoong Chan Meng**  
 Executive Director  
 Government Information  
 Management Office (GIMO)  
 ictQATAR

# QATAR SERVICE PLATFORM (QSP)
